Microsoft has done a lot of the community and the computer industry as a whole. I really do not like the way any other company and the government can try and hurt a company like Microsoft. What happened to freedom of choice. The consumer has also had a choice on the type of software that they use. This has not changed. This case is really affecting the economy and needs to end. I vote to leave Microsoft alone and let the other companies come up with great products to make the market competitive.
